

MUGASH PRIYAN U

mu3975@srmist.edu.in | 9933209738 | 2027
M.Tech - Integrated, Computer Science and Engineering - Data Science
Address : Chennai, Tamil Nadu

Summary

Software engineering-focused Computer Science student experienced in building and deploying full-stack and AI-driven applications through academic, research, and real-world projects. Built a production e-commerce system used by a real retail business, with hands-on experience in software development, problem solving, and application deployment.
Strong interest in scalable software systems and solving real-world engineering problems.

Profiles

GitHub, LinkedIn, LeetCode, HackerRank

Education

SRM IST-Kattankulathur 2027
M.Tech - Integrated · Computer Science and Engineering - Data Science CGPA - 8.69/10

VIDYA MANDIR ESTANCIA 2022
Class XII - CBSE · Computer Science · VALLANCHERY Percentage - 65%

VIDYA MANDIR ESTANCIA 2020
Class X - CBSE · VALLANCHERY Percentage - 66.6%

Experience

CodSoft | Certificate Link Jan 2024 - Feb 2024
Data Science · Intern · Virtual Internship Remote

Applied Python for machine learning tasks including classification, regression, and model evaluation across real-world datasets.

Projects

Retail Web Application | Website Link Feb 2026 - Present
Own Project · TypeScript, Supabase, PostgreSQL Web Development

- Designed and deployed a production e-commerce application for a real retail business, implementing product catalog, variants, cart, bulk ordering, and checkout workflows.
- Built responsive frontend functionality using React and TypeScript with PostgreSQL-backed data management through Supabase.
- Implemented business-specific features and continuously improved the system based on real operational requirements.

Urban Green Space Optimizer | GitHub Link Jan 2026 - Present
College Major Project · Python, PyTorch, U-Net, Streamlit, OpenCV, FastAPI Deep Learning & Computer Vision

- Architected a modular pipeline (FastAPI backend, Streamlit frontend) to serve segmentation results, decoupling model inference from the UI for maintainability.
- Built an interactive application to generate segmentation results and environmental metrics including vegetation estimation, CO_2 sequestration, cooling effects, and sustainability indicators.
- Evaluated model performance using IoU and Dice metrics and deployed the solution as an interactive application.

Chromatic Resurrection: Restoration of Black & White Images | GitHub Link Oct 2025 - Dec 2025
College Research Project · Python, JavaScript, OpenCV, NumPy, TensorFlow/Keras, HTML, CSS Machine Learning, Deep Learning

- Developed an image colorization system to transform grayscale flower images into colorized outputs using machine learning techniques.
- Implemented image preprocessing and patch-based color prediction using machine learning, with experimentation toward deep-learning-based architectures.
- Built the pipeline for image processing, model training, prediction, and visualization.

Certifications

Intro to Machine Learning | Certificate Link — Oct 2024
NPTEL · NPTEL24CS101S1233102460

Deep Learning | Certificate Link — Oct 2024
Scaler

Geodata Processing using Python | Certificate Link — Feb 2024
ISRO · 20241332317000

Data Mining | Certificate Link — Oct 2024
Great Learning

Publications

Urban Green Space Optimizer Research Paper
Academic Research Project — SRMIST | Python, PyTorch, U-Net, OpenCV

Research paper on AI-driven urban green-space identification and sustainability analysis using satellite imagery and semantic segmentation. **Paper currently in progress for future conference submission.**

Volunteering

Anna Centenary Library | Certificate — Jun 2024 - Jul 2024
Volunteer · Community Development

Assisted in RFID tagging and cataloging of books, supporting book entry, renewal, and catalog updates.
Gained hands-on exposure to library management systems, Dewey classification, and day-to-day library operations.

Competitions

Hackrush 1.0 | Link — Sep 2024
Participant · Health Tech

Code Combat 3.0 | Link
Participant · Coding Challenge

Skills

Programming Languages: Python, C++, C, TypeScript, JavaScript, SQL

Technical Skills: Data Structures & Algorithms, Object-Oriented Programming (OOP), Problem Solving, Software Development, Database Management, Model Training

Tools and Technologies: React.js, Node.js, Express.js, HTML, CSS, PostgreSQL, MongoDB, Supabase, OpenCV, Git, GitHub, Jupyter Notebook, Streamlit, Azure

Areas of Interest: Machine Learning, Deep Learning, Computer Vision, PyTorch

Languages

English [Professional Working Proficiency], Hindi [Professional Working Proficiency], Tamil [Native Proficiency]
